TO WHOMSOEVER IT MAY CONCERN

Miss Sobiya Shaikh, is a 10 year old girl with cortical phenotype T ALL who demonstrated poor early response with end induction MRD positivity (1.41%) followed by progression to morphologically and flow positive marrow disease (30-38%) after consolidation despite treatment ICICLE High risk protocol.

So alternative regimen is considered for further treatment followed by Bone marrow transplant.

The estimated cost for initial management with administration of salvage chemotherapy including management of required blood product transfusions and complications would be around 10-15 lakhs.

Kindly do the needful.
